Re-tape ducting section onto fan unit

TURNING OFF FILTER CHANGE LIGHT

GENERATION 1 - OPTION #1

Switch off at the control panel.
Press the **“down”** button for 8 seconds.
It will beep after about 3 seconds,
but keep it pressed down for the full 8 seconds
02 is displayed in the roof, 20 is displayed in the house.
Press the **“on/off”** button, and a 1 or a 5 will be displayed.
Press the **“on/off”** button again, & again to cycle through the numbers
displayed until you come back to the 1 or 5 being displayed again.
Press the **“function”** button to confirm.

GENERATION 1 - OPTION #2

Switch off at the control panel.
Press the **“down”** button for 8 seconds.
It will beep after about 3 seconds,
but keep it pressed down for the full 8 seconds
02 is displayed in the roof.
Press the **“up”** button to increase 02 to 22
(not holding it down, just short pushes) Below the 22 you will see a 0
Press the **“power”** button to increase the 0 to 9
Push the **“function”** button to save settings.
